

EXPERIENCE LETTER

This is to certify that **Mr. Muhammad Umer Sajid** has been a valuable member of our engineering team at **RISETech**, working as an **Embedded Electronics Engineer** from **February 2024** to the present date.

During his tenure, Umer has demonstrated exceptional technical proficiency in both hardware design and firmware development. He has been responsible for the complete lifecycle of multiple products, including the **Ekko** device, **Tarantula Mouse**, **AQI (Air Quality Index) Monitor**, and **EPIC**.

His technical contributions and expertise include:

- **PCB Design & Prototyping:** Expert-level use of **EasyEDA** for schematic capture and multi-layer PCB layout, with extensive experience in manufacturing coordination through **JLCPCB**.
- **Firmware Development:** Proficient in developing robust firmware using **STM32 Cube IDE** and **e2 studio** for various microcontroller architectures.
- **MCU Specialization:** Hands-on experience in programming and hardware interfacing for **STM32** and **Renesas MCUs**.
- **Product Lifecycle Management:** Successfully managed hardware maintenance and optimizations for the **Ekko** device, ensuring high reliability in production environments.

Umer is a dedicated professional with a strong aptitude for solving complex engineering challenges. His ability to bridge the gap between hardware architecture and low-level software has been a significant asset to our R&D department. He is a disciplined team player who consistently delivers high-quality results within tight deadlines.

We highly recommend him for any future endeavours and wish him continued success in his professional career.

Sincerely,

Dr. Muhammad Usman Akram

Co-Founder RISETech

Date: February 13, 2026
